

## Awards made 2014

### LEVERHULME DOCTORAL SCHOLARSHIPS

Institutions received £1,050,000 to fund fifteen PhD students over three years.

#### Durham University

*Professor Ludmilla Jordanova*  
Leverhulme Durham doctoral training programme in visual culture

#### University of Edinburgh

*Professor James Smith*  
Perfect storm – interdisciplinary doctoral training

#### University of Glasgow

*Professor Karen Lury*  
Collections: an Enlightenment pedagogy for the twenty-first century

#### University of Huddersfield

*Professor Martin Richards*  
Genetic journeys into history: the next generation

#### University of Lancaster

*Professor Gert Westermann*  
Doctoral scholarship programme in interdisciplinary research on infant development

#### London School of Economics and Political Science

*Professor Mike Savage*  
The challenge of escalating inequalities

#### University of Nottingham

*Professor Markus Owen*  
Mathematics for a sustainable society

#### Open University

*Professor Patrick McAndrew*  
Open world learning (OWL)

#### Queen's University Belfast

*Professor James McElnay*  
Leverhulme interdisciplinary network on cybersecurity and society (LINCS)

#### University of Reading

*Professor Catriona McKinnon*  
Climate justice: ethics, politics, law

#### Royal Holloway, University of London

*Professor Paul Hogg*  
The Magna Carta doctoral centre for individual freedom

#### University of Sheffield

*Professor Rob Freckleton*  
Centre for advanced biological modelling (CABM)

#### University of Southampton

*Professor Damon Teagle*  
Understanding maritime futures: opportunities, challenges, and threats

#### University of Warwick

*Professor Jan Palmowski*  
Bridges: bringing together the social and mathematical sciences to understand social information

### RESEARCH PROGRAMME GRANTS

#### *The nature of knots*

#### Dr Dorothy Buck

*Imperial College London*  
Knots in nature: DNA, the knotted molecule of life  
£1,739,476

#### Professor Paul Sutcliffe

*Durham University*  
Scientific properties of complex knots  
£1,692,509

#### *Innovation for sustainable living*

#### Mr Michael Ramage

*University of Cambridge*  
Natural material innovation  
£1,748,091

#### Professor Darren Robinson

*University of Nottingham*  
Sustaining urban habitats: an interdisciplinary approach  
£1,745,632

### RESEARCH PROJECT GRANTS

#### *Sciences*

#### Professor Andrew Adamatzky

*University of the West of England*  
Artificial Paramecium: intelligent distributed sensing and manipulation by ciliates  
£249,754

#### Dr Tim Albrecht

*Imperial College London*  
Charge transfer processes in small metal nanoparticles  
£174,768

#### Dr Christopher Bayliss

*University of Leicester*  
Mutate and survive: how bacteria fight viruses  
£158,130

#### Dr Elizabeth Bayne

*University of Edinburgh*  
Regulation of RNAi-directed chromatin modification by ubiquitin and SUMO  
£175,891

#### Dr Morgan Beeby

*Imperial College London*  
Evolutionary pathways to rotary motors: evolution and mechanism of the archaellum  
£117,620

#### Professor Simon Belt

*University of Plymouth*  
Quantification of sea ice carbon within Arctic ecosystems  
£173,049

#### Dr Alexander Belton

*University of Lancaster*  
Quantum random walks and quasi-free quantum stochastic calculus  
£84,895

#### Professor Gavin Bremner

*University of Lancaster*  
Auditory-visual congruence and young infants' perception of object persistence  
£334,712

#### Dr Saverio Brogna

*University of Birmingham*  
What are the functions of ribosomes within the nucleus?  
£147,656

#### Dr Glenn Burley

*University of Strathclyde*  
Transformable photonic circuitry: using DNA to create the next generation of molecularly active surfaces  
£231,276

#### Professor Robert Cernik

*University of Manchester*  
Using diffracted X-rays to form images with chemical and structural information  
£247,737

#### Dr Kevin Chalut

*University of Cambridge*  
Physical biology of early mammalian embryogenesis and acquisition of pluripotency  
£223,277

**Professor Neil Champness**

*University of Nottingham*  
Structural elucidation and reactivity modification in metal-organic frameworks  
£260,350

**Dr Hugo Christenson**

*University of Leeds*  
Effects of topography on ice nucleation  
£162,138

**Dr Simon J Clarke**

*University of Oxford*  
Synthesis and control of the properties of solids using soft chemical approaches  
£143,884

**Professor David Clayton**

*Queen Mary, University of London*  
Neurogenomics of perception  
£312,618

**Professor Nicola Clayton**

*University of Cambridge*  
Novel approaches to testing belief state attribution in children and corvids  
£147,728

**Dr Matthew Cook**

*Queen's University Belfast*  
Synthesis and anticancer investigation of diazamide A  
£160,889

**Dr Peter Culmer**

*University of Leeds*  
Sense and sensibility: an optimisation framework for tactile sensing  
£193,864

**Dr Sheila Cunningham**

*University of Abertay Dundee*  
The 'me' in memory: exploring the developing self and its influence on cognition  
£106,336

**Dr Judith Curran**

*University of Liverpool*  
Control of biological responses by isolated synthetic material variables  
£225,287

**Dr Hai Deng**

*University of Aberdeen*  
Using spectrometric and genetic techniques for new fluorometabolites discovery  
£69,089

**Dr Ross Denton**

*University of Nottingham*  
Catalytic alkylation reactions of free amines with alcohols  
£142,396

**Professor Stefan Doerr**

*Swansea University*  
Carbon sequestration from wildfires? Quantifying the role of pyrogenic carbon  
£231,575

**Dr Michael Doube**

*Royal Veterinary College, University of London*  
Act big, get big. Bone cell activity scaling among species as a skeletal adaptation mechanism  
£192,009

**Dr Dominic Dwyer**

*Cardiff University*  
Generality and specificity in food learning: questioning the received wisdom  
£300,233

**Professor Ian C Eperon**

*University of Leicester*  
Is RNA splicing regulated by collisions between proteins bound to a freely-diffusing RNA chain?  
£249,416

**Dr Heather Jane Ferguson**

*University of Kent*  
Imagining the self in fictional worlds: evidence from autism spectrum disorder  
£225,482

**Professor Matthew Charles Fisher**

*Imperial College London*  
The emperor's new clothes – are chytrid fungi leaving amphibians naked?  
£264,405

**Dr Sonja Franke-Arnold**

*University of Glasgow*  
Quantum memory and processing of orbital angular momentum information in atomic gasses  
£249,507

**Dr Keara Franklin**

*University of Bristol*  
How do plants sense temperature?  
£157,901

**Dr Kristian Franze**

*University of Cambridge*  
Forces in neuronal development and growth  
£166,156

**Dr Lucia Garrido**

*Brunel University London*  
Multisensory processing of faces and voices in person identity recognition  
£202,083

**Professor Andre Gerber**

*University of Surrey*  
Development of a novel translational analysis method and application in aging  
£163,720

**Dr Duncan Gill**

*University of Huddersfield*  
Convergent synthesis of aconitine  
£133,481

**Dr Stephen Goldup**

*Queen Mary, University of London*  
Mechanically chiral rotaxanes as switchable enantioselective catalysts  
£104,326

**Dr Anjali Goswami**

*University College London*  
Untangling the enigmatic origins of placental mammals with fossils and genomics  
£112,319

**Dr Lucie Green**

*University College London*  
Solar magnetic activity: bridging the gap between observation and theory  
£304,505

**Professor Michaele Hardie**

*University of Leeds*  
Structurally dynamic cages and frameworks  
£239,463

**Dr Lee Haynes**

*University of Liverpool*  
Mapping mitotic calcium signals in mammalian cells with targeted sensors  
£176,554

**Professor Michael Hayward**

*University of Oxford*  
Topochemical reduction of 4d and 5d transition metal oxides  
£105,122

**Professor Ortwin Hess**

*Imperial College London*  
Extreme nonlinear chirality in THz metasurfaces  
£184,819

**Dr Andrew Horsfield**

*Imperial College London*  
Novel excited electron devices: a computational investigation  
£147,073

**Dr Michael Hough**

*University of Essex*  
Enzyme catalysis in action: 3D movies of X-ray induced chemical reactions in protein crystals  
£173,794

**Professor Steven Howdle**

*University of Nottingham*  
A clean and versatile route to hierarchical structured functional devices  
£234,691

**Professor Brian Huntley***Durham University*

Modelling vegetation development during Pleistocene glacials and interglacials

£249,730

**Dr Geoffrey Hyett***University of Southampton*

A new method of nanosynthesis: chemical control of nanostructure in films

£95,903

**Dr Michael Ingleson***University of Manchester*

New routes to B,N-oligoacenes for application in oxygen reduction catalysis

£167,561

**Dr Andrew Jackson***University of Liverpool*

Evolutionary genomics of free-living and parasitic amoebae

£112,582

**Dr Andrew Jamieson***University of Leicester*DNA templated synthesis of de novo protein  $\beta$ -motifs

£129,566

**Dr Peter Jarowski***University of Surrey*

Computational molecular design of type IV metallopolymers

£95,707

**Professor Chris Jarrold***University of Bristol*

The development of procedural working memory

£193,065

**Dr Chris Jiggins***University of Cambridge*

Developing transgenic tests of butterfly wing patterning genes

£245,534

**Professor Hugh R A Jones***University of Hertfordshire*

PAN-Disciplinary algorithms for data Analysis

£204,219

**Professor Anne Juel***University of Manchester*

Multiple bubble propagation modes in elastorigid models of airway reopening

£156,490

**Professor Myungshik Kim***Imperial College London*

Proposal for quantum optical tests of the minimum length scale

£118,662

**Dr Ian Lane***Queen's University Belfast*

Production of ultracold hydrogen by molecular fragmentation

£180,142

**Professor Kurt Langfeld***University of Plymouth*

The density of states approach for simulations of dense matter in QCD

£137,065

**Dr Ai-Lan Lee***Heriot-Watt University*

Dual catalysis: gold and photoredox catalysis for stereoselective synthesis

£106,832

**Professor Huiyun Liu***University College London*

High-efficiency GaAsP nanowire solar cells on silicon

£181,602

**Professor Bradley Love***University College London*

Circumventing limits in memory retrieval

£256,226

**Dr Stephen Lynch***Cardiff University*

Quantum optics of mid gap chalcogen donors in single crystal silicon

£230,776

**Dr Anotida Madzvamuse***University of Sussex*

Unravelling new mathematics for 3D cell migration

£258,593

**Professor Stefan Maier***Imperial College London*

Dielectric nanoantennas: exploration of a new low-loss nanophotonics platform

£197,120

**Dr Ewan Main***Queen Mary, University of London*

Using repeat proteins to create a toolkit for synthetic biology and biotechnology

£241,357

**Dr Douglas Mair***University of Aberdeen*

Calving glaciers: long-term validation and evidence

£238,775

**Dr Mahesh Marina***University of Edinburgh*

Application-oriented TV white space networking

£232,512

**Professor Jon May***University of Plymouth*

In the dancer's mind: creativity, novelty and the imagination

£246,061

**Dr Fernando Montealegre-Z.***University of Lincoln*

The evolution of acoustic communication in fossil and extant insects

£249,154

**Dr Ian Moore***University of Oxford*

Thinking inside the box: how do plants build organised walls?

£248,344

**Dr Karen Mullinger***University of Nottingham*

Revealing the origin of human alpha oscillations using ultra high-field fMRI-EEG

£264,470

**Dr Ryan Nichol***University College London*

Probing the ultra-high energy universe with ANITA and ARA

£220,205

**Dr Sergei Novikov***University of Nottingham*

Molecular beam epitaxy for graphene/boron nitride electronics

£132,073

**Dr Niamh Nowlan***Imperial College London*

The importance of mechanical forces due to prenatal movements for spinal development

£296,349

**Dr Nathan Patmore***University of Huddersfield*

Electron transfer between hydrogen bonded 'dimers of dimers'

£103,250

**Dr Mika Peck***University of Sussex*

Rapid acoustic survey: validating acoustic methods for biodiversity assessment

£60,421

**Dr Steven Penfield***University of Exeter*

Understanding real limits to plant productivity: a macroeconomic perspective

£218,793

**Mr Sergio Pineda***Cardiff University*

Crystallographically inspired architecture: a new pathway from nanogeometry to design

£249,742

**Professor Don Pollacco**

*University of Warwick*

Homogeneous study of transiting systems

£145,100

**Dr Cristina C Popescu**

*University of Central Lancashire*

Connecting the high and low energy views of the Milky Way

£149,518

**Dr Steven Porter**

*University of Exeter*

Complex decision-making in bacteria:

predicting multikinase-networks

£93,873

**Dr Hugh Rabagliati**

*University of Edinburgh*

Expectation-driven language learning

£158,522

**Dr Ben Raymond**

*Imperial College London*

Directed evolution of virulence to overcome resistance to biological insecticide

£233,233

**Dr Thomas A Richards**

*University of Exeter*

Ancestral gene repertoires at the dawn and diversification of the eukaryotes

£212,986

**Dr Nicholas Roberts**

*University of Bristol*

Seeing the invisible – the optics of vertebrate polarisation vision

£154,879

**Dr Jonathan Robbins**

*University of Bristol*

Liquid crystals defects in Landau-de Gennes theory

£155,927

**Dr Dmitriy Rumynin**

*University of Warwick*

Hecke algebras and Kac-Moody groups: representations, lattices and categories

£152,563

**Professor Michael Ruzhansky**

*Imperial College London*

Phase space analysis on nilpotent Lie groups

£216,178

**Dr Setsuko Sahara**

*King's College London*

A quantitative approach towards understanding the evolutionary cortical size regulation

£177,936

**Professor David Salt**

*University of Aberdeen*

Mapping radial ion-transport pathways in plant roots with cell-type specific resolution

£225,631

**Dr Christoph G Salzmann**

*University College London*

Mixtures of large hydrophobes and amorphous ice: new directions in ice research

£119,421

**Dr Riccardo Sapienza**

*King's College London*

Bio-compatible silk random laser

£242,888

**Dr Tamsin Saxton**

*Northumbria University*

Dating, mating and relating: how parents shape offspring partner choice

£53,266

**Professor Dave Scanlan**

*University of Warwick*

Obtaining a mechanistic understanding of viral photosynthesis

£174,844

**Dr Steven Schockaert**

*Cardiff University*

Approximating Markov logic theories in possibilistic logic

£118,263

**Professor Walther Schwarzacher**

*University of Bristol*

Nanoparticle interactions in freeze-concentrated aqueous solutions

£173,483

**Professor Murray Selkirk**

*Imperial College London*

Dissecting the immunoregulatory function of helminth secreted proteins

£178,096

**Dr Sergey Sergeev**

*Aston University*

Combined harnessing of synchronisation in mode locked lasers

£233,587

**Dr Vahid Shahrezaei**

*Imperial College London*

The impact of cell growth and cell size on protein noise and phenotypic variability

£250,173

**Professor Dudley E Shallcross**

*University of Bristol*

Urban airborne particulate pollution, air ions and electric charge effects

£181,407

**Dr Kieran Sharkey**

*University of Liverpool*

Invasion in population dynamics

£162,614

**Professor Mike Shipman**

*University of Warwick*

New molecular scaffolds for the assembly of libraries of chiral diamines

£172,313

**Dr Nima Shokri**

*University of Manchester*

Fundamental understanding of the evaporation process from saline porous media

£148,933

**Professor Anvar Shukurov**

*Newcastle University*

Observations and models of turbulent flows: a topological approach

£200,457

**Professor S. Ravi P. Silva**

*University of Surrey*

Designer “inorganics-in-organics” semiconductors for high energy radiation detection

£248,892

**Dr Christopher Smart**

*University of Plymouth*

Shelled heteropods: morphology, molecular taxonomy and global distributions

£164,585

**Professor (Renee) Elizabeth Sockett**

*University of Nottingham*

The molecular control of bacterial biting and gliding in *Bdellovibrio*

£143,770

**Dr Michail Stamatakis**

*University College London*

Accurate and computationally efficient models for virtual catalyst design

£113,044

**Dr Tokiharu Takahashi**

*University of Manchester*

The evolutionary origin of the vertebrate head mesoderm

£153,451

**Professor Doerthe Tetzlaff**

*University of Aberdeen*

Plant-water interlinkages in northern uplands: mediation of climate change?

£249,380

**Dr Neil Andrew Thacker**

*University of Manchester*

Quantitative use of pattern recognition in the analysis of complex data distributions

£270,368

**Professor Matthew Thirlwall***Royal Holloway, University of London*

Seawater records and climate change in the Mesozoic

£249,584

**Professor Jennifer Thomas***University College London*

The path to CP violation in the neutrino sector: mega-ton water detectors

£383,431

**Dr Jim A Thomas***University of Sheffield*

Kinetically inert self-assembled macrocycles as sensors for bio-molecules

£146,312

**Dr Christopher R Thornton***University of Exeter*

Development of a rapid diagnostic test for amphibian chytridiomycosis

£142,360

**Dr Cesare Tronci***University of Surrey*

From geometry to kinetic-fluid systems (and back)

£252,676

**Professor George Turner***Bangor University*

Genome-wide analysis of the evolution of new species

£251,249

**Professor Simon Roy Turner***University of Manchester*

Exploiting microbial metagenomics to alter plant cell wall composition

£246,732

**Professor Chronis Tzedakis***University College London*

Placing the earliest human occupation of Europe in a climate context

£224,364

**Dr Jasper van Thor***Imperial College London*

A novel structural probe for the light reactions of Photosystem II

£278,450

**Dr Pieter Vermeesch***University College London*

Determining erosion rates to revive the LOREX neutrino experiment (Macedonia)

£119,337

**Dr Tobias von der Haar***University of Kent*

Ribosome movement, information processing and the language of life

£168,860

**Professor Paul Weaver***University of Bristol*

Remote chemical sensing, signal transmission and control of self-actuating structures

£210,461

**Professor A J Welch***Heriot-Watt University*

An exploration of supracosahedral non-Wadial molecular architectures

£193,422

**Dr Richard Wheatley***University of Nottingham*

A computational study of the effect of temperature and pressure on chemicals

£147,722

**Dr Roger Whitehead***University of Manchester*

New bio-catalysts for synthetically useful metabolites from available phenols

£167,478

**Dr Kielan Yarrow***City University London*

Novel neurometric measures to discriminate models of speeded decision making

£216,306

**Dr Gabriel Yvon-Durocher***University of Exeter*

The molecular mechanisms of thermal acclimation and adaptation in marine algae

£290,658

**Humanities****Professor Lynn Abrams***University of Glasgow*

Housing, everyday life and wellbeing over the long term in Glasgow c.1950–1975

£180,730

**Professor Ian Kenneth Bailiff***Durham University*

Developing new approaches to dating ancient irrigation features

£102,443

**Dr Jennie Batchelor***University of Kent*

The Lady's Magazine (1770–1818): understanding the emergence of a genre

£185,147

**Professor Michael Fulford***University of Reading*

From Roman England to Roman Britain: rural settlement, society and economy

£260,639

**Professor Chris Gosden***University of Oxford*

European Celtic art in context: exploring Celtic art and its eastern links

£223,595

**Dr Hilary Greaves***University of Oxford*

Population ethics: theory and practice

£305,487

**Dr Anne C Haour***University of East Anglia*

Cowrie shells: an early global commodity

£251,634

**Professor Colin Haselgrove***University of Leicester*

In the footsteps of Caesar: the archaeology of the first Roman invasions of Britain

£330,656

**Dr Liz Herbert McAvoy***Swansea University*The enclosed garden: pleasure, contemplation and cure in the *hortus conclusus* 1100–1450

£156,548

**Professor Thomas A Heslop***University of East Anglia*

The medieval parish churches of Norwich: city, community and architecture

£193,131

**Mr David Howell***University of Oxford*

Painting by numbers: decoding Ferdinand Bauer's colour code

£147,089

**Professor Katarzyna M Jaszczolt***University of Cambridge*

Expressing the self: cultural diversity and cognitive universals

£219,634

**Dr Andrew Jones***University of Southampton*

Making a mark: imagery and process in the British and Irish Neolithic

£97,826

**Rev Dr David Ceri Jones***Aberystwyth University*

George Whitefield (1714–1770) and trans-Atlantic Protestantism

£115,527

**Dr Parvathi Kumaraswami***University of Manchester*

Beyond Havana and the nation? Peripheral identities and literary culture in Cuba

£160,035

**Dr Jim Leary**

*University of Reading*

Extending histories: from medieval mottes to prehistoric round mounds

£264,705

**Dr Neil Loader**

*Swansea University*

New tools for science-based archaeology: isotope-supported dendrochronology

£289,875

**Professor Lutz Marten**

*SOAS, University of London*

Morphosyntactic variation in Bantu: typology, contact and change

£249,613

**Dr David Millard**

*University of Southampton*

Story places: exploring the poetics of location-based narratives

£183,260

**Professor Simon Newman**

*University of Glasgow*

Runaway slaves in Britain: bondage, freedom and race in the eighteenth century

£291,327

**Dr Jose R Oliver**

*University College London*

The Cotua Island entrepôt: building a reflexive archaeology in the Orinoco basin

£332,780

**Professor Matthew Rampley**

*University of Birmingham*

Promoting national and imperial identities: museums in Austria-Hungary

£286,602

**Professor Paula Reimer**

*Queen's University Belfast*

Freshwater reservoir effect on re-dating of Eurasian Steppe cultures

£112,245

**Professor Andrew Reynolds**

*University College London*

Travel and communication in Anglo-Saxon England

£292,207

**Dr Ian Ruffell**

*University of Glasgow*

Hero of Alexandria and his theatrical automata

£282,881

**Professor Philip Schofield**

*University College London*

The authoritative edition of Jeremy Bentham's economic writings

£297,407

**Dr Tim Shephard**

*University of Sheffield*

Music in the art of Renaissance Italy, c.1420–1540

£247,972

**Dr Emma Spary**

*University of Cambridge*

Selling exotic plant products in Paris, 1670–1730

£191,798

**Professor Stuart Taberner**

*University of Leeds*

Traumatic pasts, cosmopolitanism, and nation-building in contemporary German and South African literature

£260,140

**Professor Jane Whittle**

*University of Exeter*

Women's work in rural England, 1500–1700: a new methodological approach

£231,307

**Professor Jon Williamson**

*University of Kent*

Grading evidence of mechanisms in physics and biology

£222,096

**Professor Andrew Wood**

*Durham University*

Social relations and everyday life in England, 1500–1640

£189,360

*Social Sciences*

**Dr Nicholas Bardsley**

*University of Reading*

How individual is 'individual choice'? Exploring team reasoning in context

£77,373

**Professor Alessandro Beber**

*City University London*

Short-selling bans and bank stability: evidence from two crises

£65,074

**Professor Harriet Bradley**

*University of the West of England*

Paired peers: moving on up? The impact of social class on graduate destinations

£262,047

**Professor Fiona Brookman**

*University of South Wales*

Homicide investigation and forensic science: tracing processes, analysing practices

£216,531

**Professor Chris Brooks**

*University of Reading*

The first real estate bubble? Land prices and rents in medieval England c.1200–1550

£196,249

**Dr Joanna Brück**

*University of Bristol*

The social context of technology. Non-ferrous metalworking in later prehistoric northwest Europe (c. 1500–50 BC)

£254,082

**Dr Charlotte Burns**

*University of York*

Evaluating the impact of austerity upon environmental policy in Europe

£224,372

**Dr Mary Corcoran**

*University of Keele*

Voluntary sector adaptation and resilience in the mixed economy of resettlement

£161,064

**Dr Rob Drummond**

*Manchester Metropolitan University*

Expressing inner city youth identity through multicultural urban British English

£107,113

**Dr Amanda H Goodall**

*City University London*

Leadership, the work environment, and scientific productivity

£55,225

**Dr Andrew Hudson-Smith**

*University College London*

Visualising inequality in community networks to enhance participatory planning

£256,670

**Professor Shane D Johnson**

*University College London*

Migrant networks, decisions, and immigration policy

£205,365

**Dr Julia P G Jones**

*Bangor University*

Can payments for ecosystem services deliver environmental and livelihood benefits?

£257,224

**Dr Fernanda Leite Lopez de Leon**

*University of East Anglia*

The role of conferences on academic research: evidence from a natural experiment

£72,853

**Dr Anna Lora-Wainwright**

*University of Oxford*

Circuits of waste and value: making e-waste subjects in China and Japan

£322,557

**Professor Paul Martin***University of Sheffield*

How does inequality get 'under the skin'?  
Epigenetics, health disparities and the making  
of social policy  
£214,967

**Professor Seán McConville***Queen Mary, University of London*

Irish political prisoners 1960–2000  
£239,197

**Dr Hugh Smith***University of Liverpool*

Agricultural change in Britain: modelling past  
impacts to predict the future  
£217,766

**Dr Matthew Struebig***University of Kent*

Tolerating tigers: do local beliefs offset  
human–carnivore conflicts?  
£226,392

**Dr John Tsoukalas***University of Glasgow*

Where is the news in business cycles? A new  
approach with novel methodologies  
£119,082

**Dr Richard Whitaker***University of Leicester*

MEPs in the 2014–19 European Parliament:  
the rise of Euroscepticism?  
£56,399

**INTERNATIONAL NETWORKS***Sciences***Dr Wael Bahsoun***Loughborough University*

Statistical properties of non-uniformly  
hyperbolic dynamical systems: computer  
assisted proofs and rigorous computations  
£58,830

**Dr Istvan Ballai***University of Sheffield*

Instabilities in partially ionised prominence  
plasmas  
£108,980

**Dr Colin Beale***University of York*

Uncovering the variable roles of fire in  
savannah ecosystems  
£124,830

**Professor Joanna Bullard***Loughborough University*

High latitude and cold climate aerosols – state  
of science and future prospects  
£116,365

**Dr Sasha Dall***University of Exeter*

A Darwinian framework for phenotypically  
integrating genetic and epigenetic cues  
£84,820

**Professor Phil Green***University of Sheffield*

A cloud-based computational resource for  
clinical and educational applications of speech  
technology  
£124,994

**Professor Natalie Shlomo***University of Manchester*

Bayesian adaptive survey design network  
£113,184

**Professor Balint Toth***University of Bristol*

Laplacians, random walks, bose gas, quantum  
spin systems  
£125,520

**Professor Mark Williams***University of Leicester*

Assembling the early Palaeozoic terranes of  
Japan  
£124,846

*Humanities***Professor James Belich***University of Oxford*

**Dr Katherine Smith**

*University of Edinburgh*  
Public health and inequalities

**Dr Imogen Tyler**

*University of Lancaster*  
The sociology of inequality; social and cultural theory

## EARLY CAREER FELLOWSHIPS

In 2014 Early Career Fellows Fellowships provided fifty percent of the salary costs of a three-year research position, up to £23,000 a year, with the host university providing the balance. Research expenses of £6,000 a year are also available.

### Sciences

#### Dr Paul Albert

*University of Oxford*

Lake Suigetsu and volcanic ash, the key to synchronising palaeoclimate archives

#### Dr Alison Banwell

*University of Cambridge*

Calculating current and future mass loss from the Greenland Ice Sheet using a coupled hydrology / ice dynamics model

#### Dr Adrian Barker

*University of Cambridge*

Tidal interactions between planets and stars: simulations from first principles

#### Dr Nikolai Bode

*University of Bristol*

Genes of behaviour: mining patterns in sequenced social interactions

#### Dr Laura Bovo

*University College London*

Thin films and multilayers of frustrated magnet – tuning their exotic properties

#### Dr Moreno Coco

*University of Edinburgh*

Formation, maintenance and use of top-down knowledge in Alzheimer dementia

#### Dr Yvonne Dombrowski

*Queen's University Belfast*

Inflammasomes in brain repair

#### Dr Holly Hedgeland

*University College London*

Unlocking friction: unifying the nanoscale and mesoscale

#### Dr William Hunter

*Queen's University Belfast*

Extinction, ecosystem structure and carbon cycling in coastal sediments

#### Dr Christopher Joyner
